1412	Healy Group	Sheep Rest Lifter	Sheep Rest Lifter is value for money restraining device designed to enable one person to carry out procedures like feet trimming, drenching, tagging and other medical procedures, whilst the sheep is restrained in a comfortable & safe position. The operator can also leave the animal to retrieve more tools or medication. The lifting operation allows the worker to move the animal to a horizontal working height position to ease back strain and comfortably carry out procedures like crutching. Sheep Rest Lifter is a economical alternative to sheep handlers which run into many thousands of dollars.
1178	Quikfence	FastFencer Jr	The FastFencer Jr has been designed for farmers to help them build steel wire fences and eliminate heavy lifting of netting rolls. Farmers have the option of either 1 or 2 roll machines, with a choice if either 1300mm or 2100mm high. Designed to go on excavators, skid steers and small tractors making it easy to operate in a range of terrain. The FastFencer Jr has a clamping arm on one side, that can tension the wire. The operator uses the parent machine to hold the tension while the wire is tied off. The clamping arm on Jr can be easily swung to the other side by simply removing two clips, with the unique pivot point. This unique feature allows the operator to move the clamping arm without any heavy lifting.
1169	Grizzly Engineering	Grizzly Wheel Track Renovator II	The first trailed machine of its type that has been released to market. The Wheel Track Renovator II dynamically adjusts to the depth of the wheel track via the gauge wheel that runs in the wheel track which in turn lowers or lifts the working depth of the discs either side of the track bringing the required amount of soil into the wheel track. The machine has a patent pending design as well as; hydraulic track width adjustment, unique guarding and rear roller. With infield applications of sprays, fertilizers and harvesting operating on the same tracks its important for broadacre farmers to fix and maintain these tracks.
1089	Farmtech Machinery	Trailmax TRX-40	Built in Wodonga at Farmtech machinery, we are excited to release the first Trailmax Dump Box silage and grain trailer. Made from 350 Grade BlueScope Steel and featuring a 6mm bin on a 20mm plate chassis, this trailer is built using the highest quality materials. Like our Ausmix Feed Mixers, farmers will have the option to customise their Trailmax to suit their operations. The range will offer 40, 50 and 70m capacities.

Imported Machine of the Year

47	Clever Gate Co	Clever Gate Full Swing Gate	The full swing gate solves a longstanding problem of gates protruding into paddocks & stock getting caught behind. The patent pending self-aligning double hinged gate solves many standard gate shortfalls. The fully hot dipped galvanised gate has a double hinged, self-aligning function to allow it to be opened fully in either direction, flat against the fence & out of the way of stock, machinery and people.
1116	Kuhn Farm Machinery	Kuhn GA8131CL Twin Rotor Rake	8.1m twin rotor hayrake with patented 1.80m centre row pickup to help lift and aerate the central window.
867	Farm & Diesel Pty Ltd	Merlo Telehandler: The Merlo Mutifarmer 42-7	The Merlo Mutifarmer 42-7 sets the standards in telehandlers, with a hydrostatic transmission and unique marlo boom construction technology, very futuristic style bonnet with a steel ring around the engine compartment, standard reverse camera and three point linkage. Complete with the new Merlo Cabin
615	McCullochs	CASE Minotaur DL550 Dozer / Loader	Part Dozer, Part Loader. ALL Beast. The Case Minotaur DL550 is an all new, industry first Compact Dozer Loader. Unlike other Track Loaders that can have blades attached to their boom arms, the Minotaur's blade fully locks into the integrated C-Frame to deliver true dozer performance. It also incorporates an industry exclusive fully integrated rear ripper system. Drop off the blade and you have the most powerful Track Loader on the market. With 115hp and all the attachments that are normally associated with a compact loaders, there is very little this beast can't do. The perfect tool for Forestry, Farming, Mining and Construction applications
615	McCullochs	KIOTI TL750 Track Loader	Kioti have very successfully been in the Tractor game for many years. Now, they have ventured into the Track Loader market. Their South Korean machine is beautifully manufactured with the end result being a very high quality and capable machine, but at a more affordable price for farmers and construction companies alike. These loaders have found a big place in the lives of dairy, pig and chicken farmers and now for under \$100,000 (inc GST) for a medium horsepower piece of gear, they will make many aspects of farming a lot easier to do and afford.

Advances in Technology and Innovation

1198	Kress (Positec Australia Pty Ltd)	Kress CyberSystem	In Spring last year Positec Group launched Kress Commercial in Australia. Kress produces industry leading, commercial quality, battery outdoor power equipment (OPE), and robotic lawnmowers. Our OPE range rivals the performance of traditional petrol-powered landscaping equipment, while significantly lowering operational expenses and minimising carbon footprint. The innovative CyberSystem™ battery technology offers a sustainable transition from petrol- to battery-powered OPE, not only benefiting the environment but, the users' profitability as well. To ensure continuous operation throughout the day, the Kress CyberSystem features a unique selection of portable DC-DC chargers, enabling ultra-fast, battery charging on-the-go, even when kilometres away from the nearest AC power source. The Kress 8-minute™ Cybersystem is the first and only cordless battery power supply that will allow commercial landscapers to finally replace their expensive petrol equipment without sacrificing performance, power or runtime
47	Clever Gate Co	Clever Gate Full Swing Gate	The full swing gate solves a longstanding problem of gates protruding into paddocks & stock getting caught behind. The patent pending self-aligning double hinged gate solves many standard gate shortfalls. The fully hot dipped galvanised gate has a double hinged, self-aligning function to allow it to be opened fully in either direction, flat against the fence & out of the way of stock, machinery and people.
1256	Haymate Australia	Haymate SR5400	The Haymate is a uniquely engineered solution that ensures precise and even hay distribution, reducing waste and optimizing feed intake for healthier, more productive livestock. By minimizing manual handling and exposure to harmful particles, it also safeguards farmers' health, contributing to a safer and more sustainable farming environment. Our commitment to innovation is rooted in understanding the needs of modern farmers and delivering practical solutions that enhance their daily operations. Through continuous research and development, we aim to set new standards in agricultural technology, making farming more efficient, sustainable, and profitable.
